📘 KINDSHOT – JOINER HERO MECHANICS GUIDE

🧠 WHAT IS A JOINER HERO?

- When you join a rally, only your **first hero slot** counts.
- That hero becomes your **Joiner Hero**.
- Only the **first skill** of that hero **contributes** to the rally bonus. :contentReference[oaicite:1]{index=1}

Example:

If your march is [Chenko] [Howard] [Quinn], then:

➡️ Chenko = Joiner Hero

➡️ Only Chenko's **first skill** adds to rally bonuses.

💥 HOW MANY JOINER SKILLS COUNT?

- Up to **4 joiner skills** can be added to a rally.
- Only the **first 4 members** who join with a maxed first skill get counted.
- If an early joiner does NOT have their first skill maxed, the next joiner can fill that slot.

📊 DAMAGE FORMULA (SIMPLIFIED)

Kills = √Troops × (Attack × Lethality) / (Enemy Defense × Enemy Health) × SkillMod

Where:

- **SkillMod** comes from all active skill buffs in the rally.

• Joiner skills boost **DamageUp**, **DefenseUp**, or **OppDamageDown** in SkillMod.

🧩 STACKING JOINER SKILLS – SAME VS DIFFERENT

• If you use 4 of the SAME joiner effect (e.g., all Chenko/Amane damage buffs with same identifier),

those buffs **just add up**.

• If you use different identifiers (e.g., DamageUp 101 + DamageUp 102),

those buffs **multiply**, giving a bigger SkillMod boost. :contentReference

Example:

• 4 identical (e.g., 4 Chenko) → 100% boost

• 2 Chenko + 2 Amane → ~125% boost

(Mixing gives more damage than stacking the same.)

🧠 EFFECT TYPES (Identifiers)

• **DamageUp:** Chenko, Amadeus, Yeonwoo (all '101')

• **DamageUp:** Amane, Margot (with different identifier '102')

• **DefenseUp:** Howard, Quinn, Gordon, Saul, Hilde (various '111', '112', '113')

• **OppDamageDown:** Fahd, Eric (different identifiers '201', '202')

📍 KEY MECHANIC TAKEAWAYS

✔ Only your first hero's FIRST skill matters when joining

✔ Up to 4 joiner skills can be counted

✔ Heroes with different effect identifiers stack multiplicatively

✔ Different types of buffs (DamageUp, OppDamageDown, DefenseUp) also stack multiplicatively

✔ Hero gear * * does NOT matter for joiner skill effects * * — only the skill itself matters

═══════════════════════

🎯 BEST PRACTICE FOR JOINERS

- Use a mix of joiner heroes with * different identifiers * to gain multiplicative stack
- Max out the FIRST skill of your joiner heroes
- For attack rallies: prioritize DamageUp heroes
- For garrison: mix DefenseUp with OppDamageDown heroes
