🔥 PET REFINEMENT BASICS

- Refinement uses Taming Marks
- Each refine rolls 6 stats:
  - Infantry Health
  - Infantry Lethality
  - Archer Health
  - Archer Lethality
  - Cavalry Health
  - Cavalry Lethality

- Stats roll randomly up or down

- If total power increases → press REPLACE
- If total power decreases → press RETRY
- AUTO refine helps save time

═══════════════════

🌈 REFINEMENT RARITY TIERS

Stat rarity upgrades permanently when thresholds are reached:

Gray → Green → Blue → Purple → Gold

- Once a stat upgrades in rarity, it never drops back
- Higher rarity = much stronger bonus
- Gold rolls are rare and expensive

═══════════════════

🔧 BEST REFINEMENT STRATEGY

- Use Common Taming Marks for Gray & Green stats
- Switch to Advanced Taming Marks at Blue+
- Purple is a strong realistic target
- Gold is endgame-level luck or investment

═══════════════════

📌 PET REFINEMENT PRIORITY

- Refine pets with higher stat ceilings first
- Battle pets benefit most from refinement
- Refinement bonuses apply to ALL troops

═══════════════════

🐾 DAILY & LONG-TERM TIPS

- Run Pet Adventures daily for food & materials
- Pet stamina determines how many adventures you can run
- Pets are a slow system — don't rush refinement early
- Small gains stack up massively over time

🏆 QUICK SUMMARY
